### Data in many forms. . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer printouts, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

### How to obtain more information

Inquiries about this publication and related statistics or services should be directed to the Statistics Canada reference centre in:

St. John's	772-4073	Sturgeon Falls	753-4888
Halifax	426-5331	Winnipeg	949-4020
Montréal	283-5725	Regina	359-5405
Ottawa	992-4734	Edmonton	420-3027
Toronto	966-6586	Vancouver	666-3691

**Toll-free access** is provided in all provinces and territories, for users who reside outside the local dialing area of any of the regional reference centres:

Newfoundland & Labrador	Zenith 07037
Nova Scotia, New Brunswick & Prince Edward Island	1-800-565-7192
Québec	1-800-361-2831
Ontario	1-800-268-1151
Manitoba	1-800-282-8006
Saskatchewan	1 (112)-800-667-3524
Alberta	1-800-222-6400
British Columbia (South & Central)	112-800-663-1551
Yukon & Northern B.C. (area served by NorthwTel Inc.)	Zenith 08913
Northwest Territories	Zenith 22015

### How to order publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, Ottawa, Ontario, K1A 0V7.

### Des données sous plusieurs formes. . .

Statistique Canada diffuse des données sous diverses formes. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms, et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

### Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de cette publication ou de statistiques et services connexes doit être adressée aux centres de référence de Statistique Canada à:

St. John's	772-4073	Sturgeon Falls	753-4888
Halifax	426-5331	Winnipeg	949-4020
Montréal	283-5725	Regina	359-5405
Ottawa	992-4734	Edmonton	420-3027
Toronto	966-6586	Vancouver	666-3691

Un **service d'appel sans frais** est offert, dans toutes les provinces et dans les territoires, aux **utilisateurs qui habitent à l'extérieur des zones de communication locale** des centres de référence régionaux:

Terre-Neuve et Labrador	Zénith 07037
Nouvelle-Écosse, Nouveau-Brunswick et Île-du-Prince-Édouard	1-800-565-7192
Québec	1-800-361-2831
Ontario	1-800-268-1151
Manitoba	1-800-282-8006
Saskatchewan	1 (112)-800-667-3524
Alberta	1-800-222-6400
Colombie-Britannique (région sud et centrale)	112-800-663-1551
Yukon et le nord de la Colombie-Britannique (région desservie par NorthwTel Inc.)	Zénith 08913
Territoires du Nord-Ouest	Zénith 22015

### Comment commander les publications

On peut se procurer cette publication et les autres publications de Statistique Canada auprès des agents autorisés et des autres librairies locales, par l'entremise des bureaux régionaux de Statistique Canada, ou en écrivant à Ventes et distribution de publications, Statistique Canada, Ottawa, (Ontario), K1A 0V7.

## INTRODUCTION

This report presents 1980 income size distributions from the 1981 Census of Canada for census families and non-family persons in private households. Census family income distributions are shown by family structure, sources of income, major source of income, number and combination of employment income recipients, number of persons, number of children, 1980 work activity of husband/wife/parent and age, level of schooling and period of immigration of husband/parent. Income distributions of non-family persons are shown by sex, sources of income, major source of income, presence of employment and other income, 1980 work activity, age, level of schooling and period of immigration. Table numbers with subscript 'A' relate to census families and those with 'B' show similar data for non-family persons. Tables 1A and 1B also include 1970 income size distributions in terms of constant (1980) dollars from the 1971 Census of Canada. Most tables show data for Canada and provinces while Tables 2A and 2B give income size distributions for urban size groups, rural non-farm and rural farm areas.

Average income, median income and standard error of average income are calculated for all census families and non-family persons whether or not they reported any income. Medians have been calculated from unpublished data. Aggregate income calculated from these data should be used with caution as averages were calculated prior to rounding.

The total income concept used in the 1981 Census is identical to that used in the 1971 Census. However, while the 1971 reports included families and non-family persons in both private and collective households, the 1981 Census income statistics for census families and non-family persons are published only for those living in private households.

Income data from 1981 Census for population 15 years and over, economic families, unattached individuals and households are published in separate reports in this series as are the income statistics for subprovincial geographic areas.

## INTRODUCTION

Ce bulletin présente les répartitions de 1980 de la taille du revenu provenant des données du recensement du Canada de 1981 pour les familles de recensement et les personnes hors famille des ménages privés. Les répartitions du revenu des familles de recensement paraissent selon la composition de la famille, la source de revenu, la principale source de revenu, le nombre et la combinaison de bénéficiaires d'un revenu d'emploi, le nombre de personnes, le nombre d'enfants, l'activité de l'époux/épouse/parent seul sur le marché du travail en 1980 ainsi que son âge, le niveau de scolarité et la période d'immigration de l'époux/parent seul. Les répartitions de revenu des personnes hors famille sont présentées selon le sexe, les sources de revenu, la principale source de revenu, la présence d'un emploi et d'un autre revenu, l'activité sur le marché du travail en 1980, l'âge, le niveau de scolarité et la période d'immigration. Les numéros de tableau portant la lettre "A" se rapportent aux familles de recensement tandis que ceux portant la lettre "B" renferment des données semblables pour les personnes hors famille. Les tableaux 1A et 1B comprennent également les répartitions de la taille du revenu en 1970 en dollars constants (1980) tirées du recensement du Canada de 1971. La plupart des tableaux indiquent des données pour le Canada et les provinces, cependant les tableaux 2A et 2B illustrent les répartitions de la taille du revenu pour les régions urbaines par groupe de taille, les régions rurales non agricoles et les régions rurales agricoles.

Le revenu moyen, le revenu médian et l'erreur type du revenu moyen sont calculés pour toutes les familles de recensement et les personnes hors famille, qu'elles aient ou non déclaré un revenu. On a calculé les médianes à partir de données non publiées. Il faut utiliser avec prudence le revenu agrégé établi à partir de ces données puisque les moyennes ont été calculées avant l'arrondissement.

Le concept du revenu total utilisé au recensement de 1981 est identique à celui du recensement de 1971. Cependant, bien que les bulletins de 1971 portaient sur les familles et les personnes hors famille des ménages privés et des ménages collectifs, les statistiques sur le revenu du recensement de 1981 touchant les familles de recensement et les personnes hors famille paraissent uniquement pour les personnes demeurant dans des ménages privés.

Les données sur le revenu provenant du recensement de 1981 pour la population de 15 ans et plus, les familles économiques, les personnes seules et les ménages sont publiées dans des bulletins distincts de cette série, tout comme d'ailleurs les statistiques du revenu concernant les régions géographiques infraprovinciales.

## DEFINITIONS

**Sources of Income.** All persons 15 years or over were asked to report their total money income from the following sources during the calendar year 1980:

- (i) Wages and Salaries: These are gross wages and salaries before deductions for such items as income tax, pensions, unemployment insurance, etc. Included in this source are military pay and allowances, tips, commissions, bonuses and piece-rate payments, as well as occasional earnings in 1980. All income in kind such as free board and lodging is excluded.
- (ii) Net Income from Non-farm Self-employment: This is net income (gross receipts minus expenses of operations including depreciation) received from own non-farm unincorporated business or from a professional practice during 1980. In the case of a partnership, only the respondent's share was to be included.
- (iii) Net Income from Farm Self-employment: This is net income (gross receipts minus expenses of operations including depreciation) received from the operation of a farm, either on own account or in partnership, during 1980. In the case of a partnership, only the respondent's share of income was to be reported. Advance, supplementary or assistance payments to farmers by federal or provincial governments were to be included.
- (iv) Old Age Pensions: These pensions include payments by the federal government on account of Old Age Security, Guaranteed Income Supplements and Canada/Quebec Pension Plan benefits. Also included are Spouses' Allowances to 60 to 64 year-old spouses of Old Age Security recipients.
- (v) Family Allowances: Federal as well as provincial allowances paid during 1980 in respect of children under 18 years of age are included. These allowances, though not collected directly from the respondents, were calculated and included in the income of one of the parents.
- (vi) Unemployment Insurance Benefits: These are total unemployment insurance benefits, before income tax deductions, received in 1980.

## DÉFINITIONS

**Sources de revenu.** Toutes les personnes de 15 ans et plus devaient déclarer leur revenu total provenant des sources suivantes durant l'année civile 1980:

- (i) Salaires et traitements (rémunération): Salaires et traitements bruts avant les retenues pour l'impôt sur le revenu, les pensions, l'assurance-chômage, etc. Sont compris la solde et les allocations aux militaires, les pourboires, les commissions, les primes et les rétributions à la pièce ainsi que les gains occasionnels réalisés en 1980. Sont exclus tous les revenus en nature comme le gîte et le couvert gratuits.
- (ii) Revenu net provenant d'un travail autonome non agricole: Revenu net (recettes brutes moins les dépenses d'exploitation, y compris l'amortissement) provenant de l'exploitation d'une entreprise non agricole non constituée en corporation ou de l'exercice d'une profession pour son propre compte, en 1980. Dans le cas d'une association, le recensé devait déclarer seulement sa propre part du revenu.
- (iii) Revenu net provenant d'un travail autonome agricole: Revenu net (recettes brutes moins les dépenses d'exploitation, y compris l'amortissement) tiré de l'exploitation d'une ferme, pour son propre compte ou en association, en 1980. Dans le cas d'une association, le recensé devait déclarer seulement sa propre part du revenu. Les subventions, les paiements supplémentaires ou les avances aux agriculteurs accordés par les administrations fédérale et provinciales devaient être déclarés.
- (iv) Pensions de vieillesse: Ces pensions comprennent les paiements versés par le gouvernement fédéral comme prestations au titre de la sécurité de la vieillesse, du supplément de revenu garanti et du Régime de pensions du Canada ou du Régime de rentes du Québec. Sont également comprises les allocations payées aux conjoints de 60 à 64 ans des bénéficiaires de prestations de la sécurité de la vieillesse.
- (v) Allocations familiales: Sont comprises les allocations fédérales et provinciales versées en 1980 pour les enfants de moins de 18 ans. Bien que le montant de ces allocations n'ait pas été recueilli directement des recensés, il a été calculé et appliqué au revenu de l'un des parents.
- (vi) Prestations d'assurance-chômage: Total des prestations d'assurance-chômage reçues en 1980 avant les déductions d'impôt.

(vii) Other Government Payments: These include all other government transfer payments from federal, provincial and municipal governments during 1980. Included are veterans' pensions and allowances, cash welfare payments, workers' compensation, Canada Manpower training and mobility allowances, mothers' allowances, pensions to widows, blind and disabled, etc. Provincial income supplements are also included in this source.

(viii) Investment Income: This source includes interest from deposits in banks, trust companies, co-operatives, credit unions, etc., bond and debenture interest, all dividends from both Canadian and foreign sources, net rents from real estate, mortgage and loan interest received, regular income from an estate or trust fund, and interest from insurance policies from Canadian and foreign sources.

(ix) Retirement Pensions and Other Money Income: This source includes all regular income received as a result of previous employment of the respondent or a deceased relative. It includes pensions to retired civil servants, RCMP or career military personnel, and all annuities regardless of who purchased them, but excludes lump sum payments. It also includes regular income received during 1980 and not reported in any of the other sources, e.g., alimony, child support, periodic support from persons not in the household, net income from roomers and boarders, non-investment income such as retirement pensions from abroad, scholarships, etc.

**Receipts Not Counted as Income.** Gambling gains and losses, money inherited during the year in a lump sum, capital gains or losses, receipts from the sale of property or personal belongings, income tax refunds, loans received, loans repaid to an individual as the lender, lump sum settlements of insurance policies, and rebates of property taxes and other taxes were excluded as well as all income in kind such as free meals, living accommodation, or food and fuel produced on own farm. Refundable tax credits (e.g., child tax credit), either provincial or federal, are also not included as income.

**Total Income.** Total income is the sum of amounts received during 1980 by an income recipient from the sources of income listed above.

(vii) Autre revenu provenant de sources publiques: Tous les transferts versés par les administrations fédérale, provinciales et municipales en 1980. Sont inclus les pensions aux anciens combattants, les versements en espèces aux personnes dans le besoin, les indemnités d'accidents du travail, les prestations versées dans le cadre des programmes de formation et de mobilité de la main-d'oeuvre du Canada, les allocations aux mères nécessiteuses, les pensions aux veuves, aux aveugles et aux handicapés, etc. Cette source comprend aussi les suppléments de revenu provinciaux.

(viii) Dividendes, intérêts et autre revenu de placement: Intérêts provenant de dépôts dans des banques, des sociétés de fiducie, des coopératives, des caisses d'épargne et de crédit, etc., ainsi que des intérêts perçus au titre d'obligations garanties et non garanties et de tous les dividendes de sources canadiennes et étrangères. Comprend également les loyers nets provenant de la location d'immeubles, des intérêts d'hypothèques et de prêts perçus, le revenu ordinaire provenant d'une succession ou d'un fonds de fiducie, et des intérêts de polices d'assurance de sources canadiennes ou étrangères.

(ix) Pensions de retraite, rente et autre revenu en espèces: Tout revenu ordinaire reçu pour un emploi antérieur du recensé ou à la suite du décès d'un parent. Comprend les pensions de fonctionnaires, de membres de la GRC ou de militaires retraités et toutes les rentes quel que soit leur acheteur; les paiements forfaitaires sont exclus. Comprend aussi le revenu ordinaire reçu en 1980 qui n'a pas été déclaré dans une autre source, par exemple, pension alimentaire, soutien d'enfant, soutien périodique provenant de personnes qui ne font pas partie du ménage, revenu net provenant de pensionnaires et chambreurs, revenu ne provenant pas de placements, tel que les pensions de retraite reçues de l'étranger, les bourses d'études, etc.

**Recettes non comptées comme revenu.** Sont exclus les gains et pertes de jeu, les sommes forfaitaires héritées au cours de l'année, les gains et pertes de capital, le produit de la vente d'une propriété ou de biens personnels, les remboursements d'impôt sur le revenu, les prêts reçus, les emprunts remboursés à une personne comme le prêteur, les règlements forfaitaires de polices d'assurance, les remises d'impôts fonciers et d'autres taxes ainsi que tout genre de revenu en nature comme le gîte et le couvert gratuits, ou la nourriture et le combustible produits sur sa propre ferme. Les crédits d'impôt remboursables (par exemple, les crédits d'impôt pour enfants), soit provinciaux ou fédéraux, ne sont pas comptés comme revenu.

**Revenu total.** Le revenu total est la somme des montants reçus en 1980 par un bénéficiaire à partir des sources de revenu énumérées ci-dessus.

**Family Total Income.** The total income of a census family is the sum of the total incomes of the members of that family. Similarly, the income of a family from a particular source or sources is the sum of incomes of all family members from that source or sources.

**Average Income of Families and Non-family Persons.** The average family income refers to the weighted mean total income of census families in 1980. Average income is calculated from unrounded data by dividing the aggregate income of a group of families (e.g., husband-wife families with working wives) by the number of families in that group. Similarly, the average income of a group of non-family persons is calculated from unrounded data by dividing the aggregate income of the group by the number of all non-family persons 15 years and over in the group whether or not they reported income.

**Median Income of Families and Non-family Persons.** The median income of a group of families or non-family persons is the amount which divides the income size distribution of the group in two parts, one having incomes below the median and the other having incomes above the median.

**Standard Error of Average Income.** Refers to the estimated standard error of average income for an income size distribution. It is an estimate of the error introduced into these data due to the fact that they are collected only from a one in five random sample of households. When using these figures, the user can be reasonably certain that for a group of families or non-family persons, the true value (the value that would have been obtained had sampling not been used) lies within plus or minus twice the standard error and virtually certain that it lies within plus or minus three times the standard error. These estimates do not include the effects of certain types of response error or systematic or coverage errors.

**Constant (1980) Dollars Income.** In Table 1, the 1970 income size distributions are presented in terms of 1980 dollars. To convert the 1970 incomes into 1980 dollars, the 1970 values were revised upwards by the change in the Consumer Price Index between 1970 and 1980.

**Major Source of Income.** The major source of income of families and non-family persons indicates that income component which constitutes the largest proportion of the total income of a family or non-family person. The amounts of income in various sources of income were combined into four components as follows: wages and salaries, self-employment (non-farm and farm), government transfer payments and miscellaneous income (investment income and retirement pensions and other money income). The absolute values for these components were compared and the component with the largest absolute value was designated as the major source of income.

**Revenu total de la famille.** Le revenu total d'une famille de recensement est la somme du revenu total de chaque membre de la famille. De même, le revenu d'une famille provenant d'une ou de plusieurs sources correspond à la somme des revenus de chaque membre de cette famille provenant de cette ou ces sources.

**Revenu moyen des familles et des personnes hors famille.** Revenu total moyen pondéré des familles de recensement en 1980. Pour établir le revenu moyen à partir de données non arrondies, on divise le revenu agrégé du groupe de familles (par exemple, familles époux - épouse dans lesquelles l'épouse travaille) par le nombre de familles dans ce groupe. De même, pour établir le revenu moyen d'un groupe de personnes hors famille à partir de données non arrondies, on divise le revenu agrégé du groupe par le nombre de personnes hors famille de 15 ans et plus dans le groupe, qu'elles aient déclaré ou non un revenu.

**Revenu médian des familles et des personnes hors famille.** Valeur centrale séparant la distribution d'un groupe de familles ou de personnes hors famille, selon la taille du revenu, en deux parties égales, la première regroupant les unités ayant un revenu inférieur à la médiane, la seconde, les unités ayant un revenu supérieur à la médiane.

**Erreur type du revenu moyen.** Estimation de l'erreur type du revenu moyen calculé pour une distribution de revenu selon la taille du revenu. Il s'agit d'une estimation de l'erreur introduite dans les données du fait qu'elles sont recueillies seulement auprès d'un ménage sur cinq dans un échantillon aléatoire. Lorsqu'il se sert de ces chiffres, l'utilisateur peut être raisonnablement certain que, pour un groupe de familles ou personnes hors famille, la valeur réelle (la valeur que l'on aurait obtenue sans l'échantillonnage) équivaut à plus ou moins deux fois l'erreur type et presque certain que cette valeur équivaut à plus ou moins trois fois l'erreur type. Ces estimations ne tiennent pas compte des effets de certains types d'erreurs de réponse, d'erreurs systématiques ou d'erreurs d'observation.

**Revenu en dollars constants (1980).** Au tableau 1, les répartitions de la taille du revenu de 1970 sont présentées en dollars de 1980. Pour transformer les revenus de 1970 en dollars de 1980, on a rectifié à la hausse les chiffres de 1970 selon la variation survenue dans l'indice des prix à la consommation entre 1970 et 1980.

**Principale source de revenu.** La principale source de revenu des familles et des personnes hors famille permet de connaître l'élément qui constitue la part la plus importante du revenu total d'une famille ou d'une personne hors famille. Les chiffres de revenu provenant de diverses sources ont été répartis en quatre catégories: salaires et traitements, travail autonome (agricole, non agricole), transferts gouvernementaux et revenu divers (revenu de placements et pensions de retraite et autre revenu en espèces). On a comparé les chiffres absolus obtenus dans chacune de ces catégories et c'est la valeur la plus élevée qui détermine la principale source de revenu.

**Age.** Refers to age at last birthday (as of the census reference date, June 3, 1981). This variable is derived from date of birth.

**Census Family.** Refers to a husband and a wife (with or without children who have never married, regardless of age), or a lone parent of any marital status, with one or more children who have never married, regardless of age, living in the same dwelling. For census purposes, persons living in a common-law type of arrangement are considered as now married, regardless of their legal marital status; they accordingly appear as a husband-wife family in the census family tables.

**Census Family Status.** Refers to the classification of the population into family and non-family persons.

**Family persons** refers to household members who belong to a census family. They, in turn, are further classified as follows:

The terms **Husband** and **Wife** refer to persons living in the same dwelling as their spouse. Persons living common-law are considered, for census purposes, as now married, regardless of their legal marital status, and accordingly appear as a husband-wife family in the relevant tables.

**Lone parent** refers to a mother or a father, with no spouse present, living in a dwelling with one or more never-married children.

**Child** refers to sons and daughters (including adopted and step-children) who have never married, regardless of age, and are living in the same dwelling as their parent(s). Sons and daughters who have ever been married, regardless of their marital status at enumeration, are not considered as members of their parents' family, even though they are living in the same dwelling.

**Non-family persons** refers to household members who do not belong to a census family. They may be **related** to the household reference person - Person 1 - (e.g., brother-in-law, cousin, grandparent) or **unrelated** (e.g., lodger, room-mate, employee). A person living alone is always a non-family person.

**Census Family Structure.** Refers to the classification of census families into husband-wife families (with or without children present) and lone-parent families by sex of parent.

**Âge.** Âge au dernier anniversaire de naissance (à la date de référence du recensement, le 3 juin 1981). Cette variable est établie d'après la réponse à la question sur la date de naissance.

**Famille de recensement.** Époux et épouse (avec ou sans enfants jamais mariés, peu importe leur âge) ou un parent seul (peu importe son état matrimonial) avec un ou plusieurs enfants jamais mariés (quel que soit leur âge) vivant dans le même logement. Aux fins du recensement, les personnes vivant en union libre sont considérées comme "actuellement mariées", peu importe leur état matrimonial légal; elles figurent donc comme une famille époux-épouse dans les tableaux sur la famille de recensement.

**Situation des particuliers dans la famille de recensement.** Catégorisation de la population en personnes faisant partie d'une famille et en personnes hors famille.

**Personnes faisant partie d'une famille** - Membres d'un ménage qui font partie d'une famille de recensement. Ces personnes sont classées comme suit:

**Époux ou épouse** - Personne qui habite le même logement que son conjoint. Les personnes vivant en union libre sont considérées, aux fins du recensement, comme actuellement mariées, quel que soit leur état matrimonial légal, et figurent donc comme des familles époux-épouse dans les tableaux.

**Parent seul** - Mère ou père, sans conjoint, qui habite un logement avec un ou plusieurs enfants célibataires (jamais mariés).

**Enfant** - Fils et filles (y compris les enfants adoptés et les enfants d'un autre lit) qui ne se sont jamais mariés, peu importe leur âge, et qui vivent dans le même logement que leurs parents. Les fils et les filles qui se sont déjà mariés, peu importe leur état matrimonial au moment du recensement, ne sont pas considérés comme des membres de la famille de leurs parents, même s'ils vivent dans le même logement.

**Personnes hors famille** - Membres d'un ménage qui ne font pas partie d'une famille de recensement. Ils peuvent être **apparentés** à la personne repère du ménage, la Personne 1 (par ex., beau-frère, cousine ou grand-père) ou **non apparentés** (par ex., chambreur, compagne d'appartement ou employé). Les personnes qui vivent seules sont toujours considérées comme des personnes hors famille.

**Structure de la famille de recensement.** Catégorisation des familles de recensement en familles époux-épouse (avec ou sans enfants présents) et en familles monoparentales selon le sexe du parent.

**Highest Level of Schooling.** Refers to the highest grade or year of elementary or secondary school attended, or the highest year of university or other non-university completed. University education is considered to be above other non-university. Also, the attainment of a degree, certificate or diploma is considered to be at a higher level than years completed or attended without an educational qualification.

In 1971 and 1976, this variable was denoted as "level of schooling". In 1971, it was defined as "the highest grade or year of elementary, secondary school or university ever attended and whether or not additional training in the form of vocational or post-secondary non-university was present". In 1976, the definition was slightly revised to emphasize **completion** (rather than attendance) beyond the secondary level: "Level of schooling refers to the highest grade or year of elementary/secondary attended, or the highest year of post-secondary non-university or university completed by the person."

**Period of Immigration\*.** Refers to groupings of years derived from year of immigration reported by persons who are not Canadian citizens by birth.

\* It should be noted that the question in the 1981 Census addressed a slightly more restricted population (persons not Canadian citizens by birth) than that in 1971 (all persons born outside Canada). Due to processing restrictions, earlier censuses had only pre-defined periods of immigration which made it impossible to determine specific age at and year of immigration.

**Private Household.** Refers to a person or group of persons (other than foreign residents) who occupy a private dwelling and do not have a usual place of residence elsewhere in Canada. The number of private households equals the number of occupied private dwellings.

**Sex.** Refers to the gender of the respondent.

**Work Activity in 1980.** Derived from the number of weeks which a person 15 years of age or over (excluding inmates) worked in 1980 and whether these weeks worked were full-time or part-time.

**Plus haut niveau de scolarité atteint.** Dernière année d'études terminée ou non au niveau primaire et secondaire, ou dernière année universitaire ou non universitaire terminée. Dans la hiérarchie de la scolarité, les études universitaires sont classées au-dessus de la catégorie "autres études non universitaires". En outre, la personne qui a obtenu un diplôme se trouve classée à un échelon au-dessus de celle qui a une scolarité plus élevée mais qui n'a pas de titre scolaire.

En 1971 et 1976, cette variable était appelée "niveau de scolarité". En 1971, elle était définie comme la dernière année d'études primaires, secondaires ou universitaires terminée ou non, peu importe que les personnes aient reçu ou non une formation professionnelle ou post-secondaire non universitaire. En 1976, cette définition a été révisée de manière à insister sur le nombre d'années **terminées** au-delà du niveau secondaire. Elle se lisait comme suit: "Dernière année d'études primaires/secondaires ou dernière année d'études postsecondaires non universitaires ou universitaires achevée par le recensé".

**Période d'immigration\*.** Tranches d'années établies d'après l'année d'immigration déclarée par les personnes qui ne sont pas citoyens canadiens de naissance.

\* Il convient de noter que la question de 1981 vise un groupe plus restreint (les personnes qui ne sont pas citoyens canadiens de naissance) que celui de 1971 (toutes les personnes nées à l'extérieur du Canada). À cause des méthodes de traitement utilisées, les réponses possibles aux recensements précédents ont été groupées d'avance par périodes d'immigration de sorte qu'il est impossible d'établir l'âge particulier au moment de l'immigration et l'année de celle-ci.

**Ménage privé.** La ou les personnes (autres que des résidents étrangers) qui occupent un logement privé et qui n'ont pas de lieu de résidence habituelle ailleurs au Canada. Le nombre de ménages privés est égal au nombre de logements privés occupés.

**Sexe.** Qualité d'homme ou de femme.

**Travail en 1980.** Indique le nombre de semaines au cours desquelles les personnes de 15 ans et plus, à l'exclusion des pensionnaires d'institution, ont travaillé, en 1980, à plein temps ou à temps partiel. Il s'agit d'une variable dérivée.

**Urban Population.** Refers to persons living in an area having a population concentration of 1,000 or more and a population density of 400 or more per square kilometre.

**Urban Population Size Group.** Refers to the classification used in tabulations where the urban areas are distributed according to the following size groups:

1,000- 2,499  
2,500- 4,999  
5,000- 9,999  
10,000- 29,999  
30,000- 99,999  
100,000-499,999  
500,000 and over

Urban areas are defined using population data from the previous census. It can therefore occur that an area meeting the criteria and defined as urban according to the population data of the 1976 Census will contain fewer than 1,000 people according to the 1981 Census. Where this occurs the population is assigned to the urban population size group 1,000 to 2,499.

**Rural Population.** Refers to persons living outside "Urban Areas".

**Rural Non-farm Population.** Refers to all persons living in rural areas and who are not members of the households of farm operators living on their farms for any length of time during the 12-month period prior to the census. Prior to the 1981 Census, rural non-farm population was defined as all persons living in rural areas in dwellings other than those situated on census farms.

**Rural Farm Population.** Refers to all persons living in rural areas who are members of the households of farm operators living on their farms for any length of time during the 12-month period prior to the census. Prior to the 1981 Census, rural farm population was defined as all persons living in rural areas in dwellings situated on census farms.

## CONFIDENTIALITY AND RANDOM ROUNDING

The figures shown in this report have been subjected to a confidentiality procedure known as "random rounding" to prevent the possibility of associating small figures with any identifiable individual. Under this method, all figures including totals are randomly rounded (either up or down) to a multiple of "5". This technique provides strong protection against direct, residual or negative disclosures without adding significant error to the census data. However, since totals are independently rounded, they do not necessarily equal the sum of individual rounded figures in distributions. Also, minor differences can be expected for corresponding totals and cell values in various census reports. Similarly, percentages, which are calculated on rounded figures, do not necessarily add to the total. Percentage

**Population urbaine.** Personnes demeurant dans une région qui a une concentration démographique de 1,000 habitants et plus, et une densité de population de 400 habitants ou plus au kilomètre carré.

**Groupe de taille de la population urbaine.** Classement utilisé dans les tableaux où la répartition des régions urbaines est indiquée selon les groupes de taille suivants:

1,000- 2,499  
2,500- 4,999  
5,000- 9,999  
10,000- 29,999  
30,000- 99,999  
100,000-499,999  
500,000 et plus

Les régions urbaines sont définies à partir des données démographiques du recensement précédent. Il peut arriver qu'un territoire répondant aux critères et défini comme urbain selon les données démographiques du recensement de 1976 contienne moins de 1,000 personnes selon les résultats du recensement de 1981. Dans ce cas la population de ce territoire fera partie du groupe de taille de la population urbaine 1,000 à 2,499.

**Population rurale.** Toutes les personnes vivant à l'extérieur des régions urbaines.

**Population rurale non agricole.** Toutes les personnes qui vivaient dans une région rurale mais n'étaient pas membres de ménages d'exploitants agricoles ayant résidé dans leur ferme pendant une période quelconque douze mois avant le recensement. Avant le recensement de 1981, la population rurale non agricole comprenait toutes les personnes vivant dans une région rurale et habitant un logement situé ailleurs que dans une ferme de recensement.

**Population rurale agricole.** Toutes les personnes demeurant dans des régions rurales, qui font partie de ménages d'exploitants agricoles ayant résidé dans leur ferme pendant une période quelconque douze mois avant le recensement. Avant le recensement de 1981, la population rurale agricole comprenait toutes les personnes vivant dans des logements situés dans des fermes de recensement dans des régions rurales.

## CONFIDENTIALITÉ ET ARRONDISSEMENT ALÉATOIRE

Par souci de confidentialité, les chiffres publiés dans le présent rapport ont subi un arrondissement aléatoire qui supprime toute possibilité d'associer des chiffres à une personne facilement reconnaissable. Grâce à cette méthode, tous les chiffres, y compris les totaux, sont arrondis de façon aléatoire (vers le haut ou vers le bas) jusqu'à un multiple de "5". Cette technique assure une protection efficace contre la divulgation directe, négative ou par recoupements, sans ajouter d'erreur significative aux données. Cependant, comme les totaux sont arrondis séparément, ils ne correspondent pas nécessairement à la somme des chiffres arrondis dans les distributions. De plus, il faut s'attendre que les totaux et les autres chiffres correspondants dans divers bulletins du recensement présentent quelques légères différences. De même, la somme de pourcentages calculés à partir de chiffres arrondis ne correspond pas

distributions and rates for the most part are based on rounded data, while percentage changes and averages are based on unrounded data. Users are advised that each table is noted accordingly.

In addition to random rounding, for certain very small areas, to avoid publishing meaningless and potentially misleading data, and to absolutely avoid disclosure, a procedure referred to as "area suppression" has been adopted. Basically, the geographic area itself, as well as all data, is dropped completely from the tabulation in cases where there are fewer than 50 persons for self-enumeration areas and fewer than 25 persons for canvasser areas. Suppressed data are, however, included in the appropriate higher aggregate subtotals and totals. "Area suppression" is applied only to the sample data file, affecting the Profile Series B of bulletins and all of the User Summary Tape/Fiche program. In the case of income distributions, data are deleted if the total non-inmate population concerned is less than 250. This applies to the User Summary Tape/Fiche program, at the census tract and census subdivision levels, and within the Profile Series B.

The actual census tract (CT) or census subdivision (CSD) suppressed due to the rule described is indicated in the appendix to each Series B bulletin affected. Basic population counts, land area (and other data collected on a 100% basis) for these "missing" or suppressed entities can be obtained from the corresponding Profile Series A of bulletins, or tape and fiche program. (See Products and Services of the 1981 Census of Canada.)

Further, for certain subject-matter areas in the national and provincial bulletin series - income and industry/occupation - users will note the suppression of distributions where less than 250 persons or units are involved. In this case, the total area concerned is not suppressed, and as in "area suppression", such suppressed information is included in higher aggregates.

Further slight variations may exist in certain other circumstances, and more complete details on suppression will be contained in the Summary Guide - Sample Population (Catalogue No. 99-903).

## SAMPLING AND WEIGHTING

The 1981 Census data were collected either on a 100% basis (i.e. for all households) or on a sample basis (i.e. from only a random sample of households) with data weighted to provide estimates of the entire population. The information in this report was collected on a 20% sample basis and weighted up to compensate for sampling. All table headings are noted accordingly.

forcément au total des éléments. Les répartitions en pourcentage et les taux sont dans la plupart des cas basés sur des données arrondies, alors que les variations en pourcentage et les moyennes sont basées sur des données non arrondies. Les renvois au bas des tableaux avertissent l'utilisateur en conséquence.

Outre l'arrondissement aléatoire, pour éviter de présenter des renseignements inutiles et possiblement erronés et pour éliminer absolument toute divulgation, on a adopté, dans le cas de très petites régions particulières, une procédure connue sous le nom de "suppression des régions". Il s'agit essentiellement de supprimer complètement d'un tableau les régions géographiques elles-mêmes (et toutes les données) lorsqu'elles comptent moins de 50 habitants pour les secteurs d'autodénombrement ou moins de 25 habitants pour les secteurs de recensement par interview. Toutefois, les données supprimées sont incluses dans les totaux et totaux partiels à un niveau agrégé supérieur. Cette procédure s'applique seulement au fichier des données-échantillon, c'est-à-dire aux bulletins de la Série des profils B et au programme des bandes sommaires et des microfiches. Dans le cas des répartitions de revenus, les données sont supprimées lorsque le nombre total des pensionnaires hors institution visés est inférieur à 250. On applique également cette méthode au programme des bandes sommaires et des microfiches, au niveau des secteurs de recensement et des subdivisions de recensement ainsi que dans la Série des profils B.

Le secteur de recensement (SR) ou la subdivision de recensement (SDR) supprimés en raison de cette règle sont indiqués à l'annexe de chaque bulletin de la Série des profils B en question. Les principaux chiffres de population, les superficies (et les autres données recueillies sur une base de 100 %) pour ces entités manquantes ou supprimées sont présentés dans les bulletins correspondants de la Série des profils A ou sur les bandes et microfiches. (Voir Produits et services du recensement du Canada de 1981.)

En outre, pour certains sujets spécialisés (revenu, activité économique et profession) traités dans les bulletins de la Série nationale et de la Série provinciale, les utilisateurs noteront que les répartitions touchant moins de 250 personnes ou unités ne sont pas présentées. Dans un tel cas, la région complète n'a pas été éliminée, et comme pour la suppression de régions, les données manquantes figurent à un niveau agrégé supérieur.

Il est possible que d'autres variations minimales existent ailleurs auquel cas le Guide sommaire - Population-échantillon (n° 99-903 au catalogue) en donnera des renseignements plus détaillés.

## ÉCHANTILLONNAGE ET PONDÉRATION

Les données du recensement de 1981 ont été recueillies sur une base de 100 % (c'est-à-dire auprès de tous les ménages) ou par un échantillonnage aléatoire des ménages; ces données sont pondérées afin de fournir des estimations sur l'ensemble de la population. Les renseignements figurant dans le présent bulletin ont été recueillis auprès d'un échantillon de 20 % et pondérés afin de compenser l'effet de l'échantillonnage. Tous les titres des tableaux ont été annotés en conséquence.

For any given geographic area, the weighted population, household, dwelling or families, total or subtotal may differ from that shown in reports containing data collected on a 100% basis. Such variation (in addition to the effect of random rounding) will be due to sampling.

## DATA QUALITY

### Introduction

Any census data will be subject to error. Some of the errors will tend to cancel out over a large number of cases (i.e. for larger cells) as errors will be made in both directions (i.e. random errors). In general the proportion or rate of net (i.e. uncanceled) random error increases as the population or cell size decreases. Thus small data values should be used with some caution.

Other of the errors will tend not to cancel out as they will have a tendency to occur in one direction more than another (systematic errors, for example, question wording which invites errors in one direction more than in the other) and will result in a bias.

The data contained in this bulletin are subject to coverage errors, response errors, processing errors and to sampling errors, in addition to any errors introduced by random rounding.

### Coverage Error

A coverage error occurs in the census whenever a person or a household is missed completely or counted more than once. Since overcoverage is expected to be fairly rare in relation to undercoverage, the net effect of such errors is to introduce a downward bias in census figures, so that the published census estimates tend to underestimate the actual population.

A special study was undertaken in relation to the 1981 Census to measure the extent of the bias due to undercoverage. This study estimated the overall undercoverage rate to be of the order of 2% of the total population. It also indicated that undercoverage is higher in certain segments of the population, e.g., young male adults and recent immigrants. Similar trends were obtained in connection with the 1976 Census.

### Response Error

A response error occurs when the response recorded is incorrect. Such errors may occur due to the respondent misinterpreting the question, inadvertently checking the wrong box, or even consciously checking the wrong box. Contributing to this error may be the questionnaire wording or organization, or the training and attitude of enumerators.

Quelle que soit la région géographique, le total ou total partiel pondéré de la population, des ménages, des logements ou des familles peut différer de celui qui figure dans les bulletins de données intégrales. Cet écart (autre l'effet de l'arrondissement aléatoire) sera attribuable à l'échantillonnage.

## QUALITÉ DES DONNÉES

### Introduction

Dans tout recensement, les données recueillies peuvent être entachées d'erreurs. Certaines de ces erreurs tendent à s'annuler à mesure que le nombre de cas observés augmente (c'est-à-dire dans le cas des classes plus importantes) puisque les erreurs se font dans les deux sens (erreurs aléatoires). De façon générale, la proportion ou le taux d'erreurs aléatoires nettes (c'est-à-dire qui ne se sont pas annulées) augmente au fur et à mesure que la taille de la population ou de la classe diminue. Aussi, faut-il utiliser avec une certaine réserve les petits chiffres obtenus.

Dans d'autres cas, les erreurs ne s'annulent pas parce qu'elles ont tendance à se produire dans un sens plutôt que dans un autre. Il s'agit d'erreurs systématiques. Par exemple, le libellé d'une question peut favoriser les erreurs dans un sens particulier. Ces erreurs entraînent un biais.

Des erreurs d'observation, des erreurs de réponse, des erreurs de traitement et des erreurs d'échantillonnage en plus des erreurs d'arrondissement aléatoire ont pu influencer sur la qualité des données fournies dans le présent bulletin.

### Erreur d'observation

Il y a erreur d'observation au recensement lorsqu'on oublie complètement une personne ou un ménage ou qu'on le (ou la) compte plus d'une fois. Étant donné qu'on s'attend à ce que le surdénombrement soit assez rare par rapport au sous-dénombrement, de telles erreurs produisent un biais vers le bas dans les statistiques du recensement, de sorte que les estimations publiées du recensement tendent à sous-estimer le chiffre réel de population.

On a entrepris une étude spéciale sur le recensement de 1981 afin d'évaluer le biais entraîné par le sous-dénombrement. Selon les résultats, le taux global du sous-dénombrement serait de 2 % de l'ensemble de la population. L'étude a révélé que le sous-dénombrement est plus élevé dans certains groupes de la population, par exemple chez les jeunes adultes de sexe masculin et les nouveaux immigrants. On avait décelé les mêmes tendances lors du recensement de 1976.

### Erreur de réponse

Une erreur de réponse se produit lorsque la réponse enregistrée est incorrecte. De telles erreurs surviennent lorsque le répondant a mal interprété la question ou a coché la mauvaise case par inadvertance ou même volontairement. La formulation des questions ou le mode de présentation du questionnaire ainsi que la formation et l'attitude des agents recenseurs sont des facteurs qui peuvent favoriser ce genre d'erreurs.

## Processing Error

Processing errors can occur when write-in answers are coded, when responses on the questionnaire are transcribed to be read by the computer, and when imputations are done either for non-response or for edit rejects.

## Sampling Error

Data based upon responses collected on a sample basis and then weighted are subject to error due to the fact that the distribution of characteristics within the sample will not usually be identical to the distribution of characteristics within the population from which the sample has been selected.

The potential error that sampling has introduced will vary according to the relative scarcity of the characteristics in the population. For large cell values the potential error due to sampling, as a proportion of the cell value, will be relatively small. For small cell values this potential error, as a proportion of the cell value, will be relatively large.

The following table provides approximate measures of the error due to sampling. These measures are intended as a general guide only.

**Table: Approximate Standard Error Due to Sampling for 1981 Census Sample Data**

**Tableau: Erreur type approximée provenant de l'échantillonnage des données-échantillon du recensement de 1981**

	Cell Value - Valeur des cases												Erreur type approximée
	50	100	200	500	1,000	2,000	5,000	10,000	20,000	50,000	100,000	500,000	
Approximate Standard Error	15	20	30	45	65	90	140	200	280	435	600	1,300	

Users wishing to determine the approximate error due to sampling for any given cell of data, based upon the 20% sample, should choose the standard error value in the column of the standard error table whose heading is closest to the value of the given cell in the census tabulation. When using the obtained standard error value, in general the user can be reasonably certain that, for the enumerated population, the true value (discounting all forms of error other than sampling) lies within plus or minus three times the standard error (e.g., for a cell value of 1,000 the range would be 1,000 + or - 3X65 or 1,000 + or - 195).

## Erreur de traitement

Des erreurs de traitement peuvent se produire lorsque des réponses en toutes lettres sont codées, lorsque les réponses du questionnaire sont transcrites en langage d'ordinateur et lorsqu'on fait des imputations pour tenir compte soit de la non-réponse soit des rejets au contrôle.

## Erreur d'échantillonnage

Les données qui sont basées sur les réponses recueillies auprès d'un échantillon et qui sont ensuite pondérées sont sujettes à une erreur vu que la répartition des caractéristiques au sein de l'échantillon n'est habituellement pas identique à la répartition des caractéristiques au sein de la population à partir de laquelle l'échantillon a été prélevé.

L'erreur possible introduite par l'échantillonnage variera en fonction de la rareté relative de la caractéristique au sein de la population. Lorsqu'il y a des cases comportant des chiffres assez grands, l'erreur possible attribuable à l'échantillonnage, en proportion de la valeur de la case, sera relativement petite. Si les valeurs des cases sont petites, cette erreur, en proportion de la valeur de la case, sera toutefois relativement importante.

Le tableau suivant présente une évaluation approximée de l'erreur provenant de l'échantillonnage. Cette évaluation ne devrait servir que de guide.

Les utilisateurs qui désirent connaître l'erreur approximée provenant de l'échantillonnage pour une case de données en particulier, d'après l'échantillon 20 %, n'ont qu'à choisir la valeur de l'erreur type dans la colonne du tableau des erreurs types dont la rubrique est le plus près de la valeur de la case dans la totalisation du recensement. Lorsqu'il utilise la valeur obtenue de l'erreur type, l'utilisateur peut en général être raisonnablement certain que la valeur réelle de la population recensée (si l'on ne tient compte d'aucune forme d'erreur autre que l'échantillonnage) se situera à plus ou moins trois fois l'erreur type (par exemple pour une case dont la valeur est 1,000, l'écart s'étendra de 1,000 + ou - 3X65 ou 1,000 + ou - 195).

The standard errors given in the above table will not apply to population or universe (persons, households, dwellings or families) totals or sub-totals for the geographic area under consideration (see Sampling and Weighting above). The effect of sampling for these cells can be determined by comparison with a corresponding 100% bulletin.

The effect of the particular sample design and weighting procedure used in the 1981 Census will vary, however, from one characteristic to another and from one geographic area to another. The standard error values in the above table may, therefore, understate or overstate the error due to sampling. Factors which can be applied as an adjustment to these standard error values for each individual variable may be obtained by contacting the nearest Statistics Canada reference centre (see inside front cover).

These adjustment factors, additional information on the census methodology - in particular on sampling and weighting - and a more comprehensive assessment of the quality of the census data collected on a sample basis will be included in Data Quality - Sample Population (Catalogue No. 99-905).

## SPECIAL NOTES

### Census Family Type Data

Due to improvements in the method of determining Census Family Type implemented for the 1981 Census (see definition), caution should be used in comparing the distribution of primary and secondary families with data from previous censuses. For example, census families in private households where the person responsible for household payments is residing elsewhere are automatically classified as secondary families in 1981. In previous censuses, first, the identification of these cases was not possible and second, some of these families were classified as primary families.

Further explanation of these changes is included in the Summary Guide - Total Population (Catalogue No. 99-902).

### Schooling Data

Comparisons of the 1981 Census schooling data with past censuses or with other sources should generally be restricted to uniform characteristics, and to similar temporal and population components.(1) General comparisons that are made should

Les erreurs types données dans le tableau ci-dessus ne s'appliqueront pas aux totaux ou totaux partiels de la population ou de l'univers (personnes, ménages, logements ou familles) de la région géographique à l'étude (voir Échantillonnage et pondération ci-dessus). On peut connaître l'effet de l'échantillonnage sur ces cases en consultant le bulletin correspondant qui présente les données intégrales.

Les répercussions du plan d'échantillonnage et de la procédure de pondération utilisées au recensement de 1981 varieront, cependant, d'une caractéristique à une autre et d'une région géographique à l'autre. Les valeurs de l'erreur type dans le tableau ci-dessus pourront toutefois surestimer ou sous-estimer l'erreur provenant de l'échantillonnage. Pour obtenir les facteurs qui peuvent servir à rectifier les valeurs de l'erreur type de chaque variable, on peut s'adresser au centre de référence de Statistique Canada le plus proche (voir les renseignements au verso de la couverture avant).

Ces facteurs de rectification ainsi que des renseignements additionnels sur la méthodologie du recensement (plus particulièrement sur l'échantillonnage et la pondération) et une évaluation plus complète de la qualité des données du recensement recueillies auprès de l'échantillon paraîtront dans le bulletin Qualité des données - Population-échantillon (n° 99-905 au catalogue).

## NOTES SPÉCIALES

### Données sur le genre de famille de recensement

Comme la façon de déterminer le genre de famille de recensement a été améliorée lors du recensement de 1981 (voir la définition), nous conseillons aux utilisateurs d'être prudents lorsqu'ils comparent les données sur la répartition des familles principales et des familles secondaires à celles des recensements antérieurs. Par exemple, sont automatiquement classées comme familles secondaires en 1981 les familles de recensement dans les ménages privés où la personne responsable des paiements du ménage habite ailleurs. Aux recensements précédents, premièrement, il n'était pas possible d'identifier ces cas et deuxièmement, certaines de ces familles étaient classées comme familles principales.

On trouvera de plus amples renseignements dans le Guide sommaire - Population totale (n° 99-902 au catalogue).

### Données sur la scolarité

Les comparaisons des données du recensement de 1981 sur la scolarité avec celles des recensements antérieurs ou d'autres sources doivent généralement se limiter à des caractéristiques uniformes et aux mêmes composantes temporelles et démographiques(1). Pour les

(1) Users interested in historically comparable census education data for the years 1971, 1976 and 1981 are referred to Special Bulletin, Catalogue No. 13-579: Historical Tables for Census Education Data: 1971, 1976 and 1981, to be released at a later date.

(1) Les utilisateurs qui désirent des données chronologiques du recensement sur l'éducation pour les années 1971, 1976 et 1981 pourront se référer au bulletin spécial, n° 13-579 au catalogue: Tableaux chronologiques de données sur l'éducation, recensements de 1971, 1976 et 1981, qui doit paraître à une date ultérieure.

take note of the fact that the 1981 schooling data, in contrast to that for previous census years, exclude inmates of institutions, and are reported only for the population 15 years and over, in contrast with 1971 and earlier censuses which reported schooling figures for the population 5 years and over. More specifically, there is one main aspect of the 1981 schooling data which distinguishes it from other sources.

The main aspect of the 1981 Census schooling data where comparability is affected is in the "other non-university education" category. The other non-university education concept differs from previous censuses and from other measures of the so-called post-secondary non-university concept in two respects. First, in contrast to the 1976 Census, this question now relates to all university transfer courses of community colleges, and the CEGEP general of Quebec; therefore, a shift in the data from university to non-university can be expected and does indeed occur between 1976 and 1981 (especially for the CEGEP population). Second, the 1981 question has been broadly conceptualized to encompass all non-university schooling beyond elementary or secondary, regardless of secondary school graduation. The 1981 other non-university education concept covers a broad spectrum of schooling that includes the conventional post-secondary areas as well as other training in the trades and vocational areas.

### Rural Farm Population

It is quite probable that the counts shown for "rural farm population" are below the 1976 counterparts due to the more exclusive nature of the 1981 definition - see "Rural Farm Population" in the definition section.

### REFERENCE PRODUCTS

The 1981 Census Dictionary (Catalogue No. 99-901) contains the complete range of definitions for all variables and terms used in the 1981 Census data products. Of general interest would be information contained in Summary Guide - Total Population (Catalogue No. 99-902) and Summary Guide - Sample Population (Catalogue No. 99-903) which include reproductions of the census questionnaire forms and basic indicators of data quality. Further details on the data quality may be obtained from Data Quality - Total Population (Catalogue No. 99-904) and Data Quality - Sample Population (Catalogue No. 99-905).

A wide range of other analytical and reference products are available and described, along with information on data products and available services, in Products and Services of the 1981 Census of Canada.

comparaisons générales, il convient de noter que les données de 1981 sur la scolarité, contrairement à celles des recensements antérieurs, ne comprennent pas les pensionnaires d'institution et ne visent que la population de 15 ans ou plus alors qu'aux recensements de 1971 et des années précédentes, les données sur la scolarité existaient pour la population de 5 ans ou plus. Il y a en outre un aspect essentiel qui distingue les données de 1981 de celles provenant d'autres sources.

Cet aspect essentiel se retrouve dans la catégorie des "autres études non universitaires" utilisée au recensement de 1981. Le concept des autres études non universitaires diffère, à deux égards, des recensements antérieurs et des autres mesures du concept "niveau postsecondaire non universitaire". Premièrement, contrairement au recensement de 1976, cette expression désigne maintenant tous les programmes de passage à l'université des collèges communautaires et le programme général des CEGEP du Québec; on peut donc s'attendre à ce que les données portent non plus sur les études universitaires mais sur les études non universitaires, et c'est ce qui arrive entre 1976 et 1981 (surtout pour la population des CEGEP). Deuxièmement, la question posée au recensement de 1981 englobait toutes les études non universitaires après le niveau élémentaire ou secondaire, peu importe que la personne ait obtenu son diplôme d'études secondaires ou non. Le concept des autres études non universitaires de 1981 a un sens large qui regroupe les études postsecondaires traditionnelles ainsi que la formation professionnelle et technique (métiers).

### Population rurale agricole

Il est fort probable que les chiffres de la "population rurale agricole" soient inférieurs à ceux de 1976 en raison de la nature plus restrictive de la définition de 1981 - voir "Population rurale agricole" dans la partie des définitions.

### PRODUITS DE RÉFÉRENCE

Le Dictionnaire du recensement de 1981 (n° 99-901 au catalogue) donne les définitions de toutes les variables et de tous les termes utilisés dans les produits du recensement de 1981. Les renseignements que renferment le Guide sommaire - Population totale (n° 99-902 au catalogue) et le Guide sommaire - Population-échantillon (n° 99-903 au catalogue), présentent un intérêt général puisqu'ils donnent une reproduction des questionnaires du recensement et les indicateurs de base de la qualité des données. On peut obtenir plus de détails sur la qualité des données dans Qualité des données - Population totale (n° 99-904 au catalogue) et Qualité des données - Population-échantillon (n° 99-905 au catalogue).

La publication Produits et services du recensement du Canada de 1981 décrit une foule d'autres analyses et de produits de référence, et fournit des renseignements sur les produits et services disponibles.

## SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
  - nil or zero.
- amount too small to be expressed.

## SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
  - néant ou zéro.
- nombres infimes.
